Company Background

MPOWER Technologies the leader in web-portal technology was founded in October 2002 and is privately owned. Through constant technical innovation and unparalleled customer service, MPOWER has become the leader for the mid-market businesses who want a sophisticated technology gateway to manage their business and their business relationships efficiently and cost effectively.

MPOWER Technologies serves a wide range of customer industries, from gaming, media, distribution, financial services, franchises to not for profit and insurance. We work in any vertical market where the client has employees, suppliers, customers and a strategy to integrate and leverage their existing technology investments.

The *MPOWER Developer Console*: is the starting point to retrieve and integrate all your business data and information.

The *MPOWER Manager*: is your business and security layer to define “who sees what” so specific targeted information and applications are available to the end-user.

The *MPOWER Portal*: is the point of entry where the end-user can retrieve specific defined information and applications that keep them productive and interactive.

Mission Statement

Provide a global model and a web-portal for the mid-market that will revolutionize productivity and profitability for businesses with a strategy to grow.
